OBJECTIVE

Dynamic AI & ML enthusiast with expertise in computer vision, deep learning, and Python libraries. Skilled at leveraging cutting-edge technologies to drive innovation and solve complex problems. Proficient in data analysis tools and known for a strong work ethic and passion for continuous learning. Eager to contribute expertise and lead impactful projects in a collaborative environment.

KEY COMPETENCIES

- Programming languages: Python , C, Java (Core)
- Deep Learning
- Machine learning
- Computer vision
- Data analysis and visualization tools: Pandas, NumPy, Matplotlib, Seaborn, PowerBI
- Natural Language Processing (NLP)
- Data Structures and Algorithm
- Databases and Query Languages: MySQL (Structured Query Language)

EXPERIENCE

Data Analytics Intern

IBM Skillbuild + CSRBOX

June 2024-July 2024

Remote Internship

- Led a team of 7 members in a data science project focused on sustainable development goals.
- Collected and analyzed comprehensive datasets to identify trends and patterns.
- Implemented data preprocessing and cleaning techniques to ensure data quality.
- Utilized python and machine learning algorithms to extract meaningful information.
- Delivered a compelling presentation highlighting project outcomes and recommendations.

AWARDS

Project 1: Face Emotion Recognition

- Developed a Face Emotion Recognition system using deep learning techniques (CNNs) to classify emotions from facial expressions.
- Collected and preprocessed the FER-2013 dataset, including face detection and data augmentation for improved model accuracy.
- Trained and fine-tuned a CNN model, optimizing hyperparameters to achieve high accuracy in emotion classification.
- Integrated OpenCV for real-time face detection and emotion recognition from live video feeds and achieved an accuracy of 75% in emotion classification.

Project 2: Breast Cancer Detection

- Developed a Breast Cancer Detection system using machine learning techniques to predict the likelihood of cancer based on patient data (e.g., tumor features) by first collecting and preprocessing data from the well-known Wisconsin Breast Cancer Dataset (WBCD), performing tasks such as handling missing values, feature scaling, and data normalization.
- Implemented multiple classification models including Logistic Regression, Decision Trees, and Support Vector Machines (SVM), comparing their performance to identify the best-suited model for accurate predictions.

Project 3: Movie Recommendation System

- Developed a movie recommendation system using machine learning to suggest personalized films based on user preferences.
- Implemented collaborative filtering and content-based techniques for accurate recommendations.
- Optimized data processing for real-time recommendations.

EDUCATION & CERTIFICATIONS

Bachelors in Computer Science Engineering

(Specialized in AI & ML), GPA: 8.6/10

Guru Jambheshwar University of Science & Technology,
Hisar (Nov 2021 - May 2025)

Qualified GATE 2024 (DA)

NPTel Python for Data Science (scored 72%)

Class XII, CBSE : 95.6%

Jain Public School, Haryana (April 2020- Mar 2021)

EXTRACURRICULAR ACTIVITIES

- Participated in hackathons at Shiv Nadar University, Noida and Netaji Subhash University of Technology, Delhi collaborating with teams to develop innovative solutions.
- Engaged in the IIT Mandi Catalyst program, fostering entrepreneurship and innovation through workshops and mentorship.
- Actively volunteered with National Service Scheme (NSS), contributing to community service initiatives for social welfare and development.
